EXPERIENCE

Electronic Data Systems (EDS), San Francisco, CA
Senior Infrastructure Architect

July 2008 - November 2008

Managed development environment and designed production architecture for an Oracle J2EE project for client Delta Dental.

Bayview Financial, LLC, Miami, FL
Middleware Administrator

November 2004 - June 2008

I architected, installed and maintained multiple Oracle Portal web sites. These included several corporate Intranet sites and one major revenue-generating Internet-facing web site. In addition to the application server layer, I was also responsible for the infrastructure tier (identity management and databases). I also provided engineering and support for the company's Tomcat/Apache and Weblogic platforms. This position involved significant Linux and UNIX system administration.

Oracle Corporation, Rocklin, CA
Application DBA

October 2000 - October 2004

I was a member of the Internet Hosting Services team, maintaining J2EE websites. These were all multi-tier, load-balanced applications running Oracle tech stacks on top of Sun Solaris and/or RedHat Linux. This was primarily a project-based position and required independent time management. I was the primary operations person for the company global intranet site my.oracle.com, which also served as the first production rollout project for demonstrating and testing new technology and updates, as well as for Oracle's corporate and customer-facing Single Sign On solution, login.oracle.com.

Earthlink, Inc, Natomas, CA
Technical Agent

November 1999 - October 2000

I provided first and second level support to Earthlink's ISP customers. I acted in a senior capacity, providing leadership, training and documentation to other agents.

EDUCATION

National University
2014 - 2018
B.S. Computer Science
GPA 3.4

University of California, Berkeley
1995 - 1999
Studied Physics and Math.

SKILLS

Linux / UNIX Administration local data center and cloud services like AWS and Digital Ocean

Application Servers / Frameworks: Apache / Tomcat, Weblogic, Oracle Application Server (OAS), Django

Databases: RDBMS (Oracle and MySQL) and NoSQL (MongoDB)

Object Oriented Software Design

Programming Languages: C/C++, Python and Java
